

---

**Subject: Infant Food Package - Special Formula**

---

Effective Date: January 3, 2006

Revised from: October 1, 2004

**Policy:** Special formulas (including exempt infant formulas and medical foods) may be issued when a licensed health care professional determines that client has a medical condition that precludes the use of the primary contract formula. These conditions include metabolic disorders, inborn errors of amino acid metabolism, GI disorders, malabsorption syndrome allergies, and increased nutritional needs associated with prematurity or other conditions. State Nutritionists are available for consultation and review on any questions regarding formula use.

The Special Formula Issuance Form must be completed and kept on file for all special formulas. A new request is required when the requested time frame expires or whenever the formula is changed to another special formula or a non-contract infant formula.

**Procedure:**

1. Obtain a completed Special Formula Issuance Form from the health care professional.
  - a. A physician or ARNP/RPA working under the supervision of a physician must sign the Special Formula Issuance Form.
  - b. The following items are required to be documented before a special formula may be issued.
    - Formula (brand name of the formula requested)
    - Acceptable diagnoses
    - The medical reason that supports the issuance of a special formula. Each decision to honor a request for a special formula should be contingent upon the infant's medical diagnosis, feeding history, and the composition of the requested formula. Refer to the Product List (Appendix 1) for a description, recommended uses, features and nutritional information for each formula.
    - If the special formula is requested for "intolerance" or "formula intolerance." a five-day feeding trial for two separate primary contract infant formulas, which demonstrate formula tolerance problems, must be documented in the client's WIC record prior to issuing the special formula. The documentation must include a description of the formula tolerance problems. (see Policy: FCI02.1.3 - Infant Food Package – Non-Contract Infant Formula for a complete description of formula trials.)
    - Daily amount required.
    - Length of time formula required

---

**Subject: Infant Food Package - Special Formula**

---

- Health care professional's name and signature.
  - c. If the health care professional submits a referral form, note or hospital discharge sheet that includes all the required information, the CPA may complete the Special Formula Issuance Form based on the submitted information. The original information must be filed with the Special Formula Issuance Form.
  - d. Contact the health care professional if all required information is not submitted.
  - e. After ensuring all required information is documented the CPA should complete the "WIC Office Use Only" section and sign the Special Formula Issuance Form.
2. Prescribe an age and situation appropriate food package containing the special formula requested. (see Table).
- a. If the desired food package is not available in KWIC, contact the SA.
  - b. If there is a choice in consistency, the caregiver may request either the powdered or the concentrated liquid form. If ready-to-feed formula is requested, document the reason in the client's KWIC record. (see Policy: FCI 02.01.00 – Infant Food Packages).
  - c. If the information submitted by the health care professional is missing or not complete:
    - And the health care professional is available while the client is in the WIC clinic, one month's checks may be issued if the missing, required information is obtained by telephone and documented in the infant's WIC record.
    - And the health care profession cannot be contacted while the client is in the WIC clinic, one month's checks may be issued if the CPA documents why the request for non-contract infant formula is valid in the client's WIC record.
    - A completed Special Formula Issuance form must be on file at the WIC clinic before additional checks can be issued.
3. All unused WIC purchased formula and/or checks must be returned to the Local Agency prior to issuing a different formula food package. Formula must not be returned to stores.
- a. Follow the procedure for replacing formula or partial month's checks.
  - b. The CPA must change the food package.
  - c. See Policy FCI: 02.05.00-Documentation and Use of Returned Formula for instructions on handling returned formula.
